Image Targets August As Image Month

In August, the Image Comics line grows with the addition of two more titles, ***CyberForce*** and ***Shadowhawk;*** to celebrate the rapid expansion of the Image line to seven titles, publisher Dave Olbrich has announced that August will be "Image Comics Month," complete with a the release of a special one-shot, ***Image Comics #0.***

"Now that the Image Universe is taking shape," Olbrich said, "we wanted to offer a special promotion to all of the fans who have helped to make it possible." Olbrich explained that Image will offer a special coupon in each of seven Image titles for August (***CyberForce #1, Shadowhawk #1, Brigade #2, WildCATs #2, Savage Dragon #3, Spawn #4,*** and ***Youngblood #0***); fans who collect all seven coupons and mail those original coupons (no copies will be accepted) to Image will receive a special ***Image Comics #0,*** featuring original short stories by Rob Liefeld, Erik Larsen, Todd McFarlane, Jim Valentino, Jim Lee, and Marc Silvestri. These stories are created especially for this bonus book and "will never be reprinted in the format of ***Image Comics #0.***"

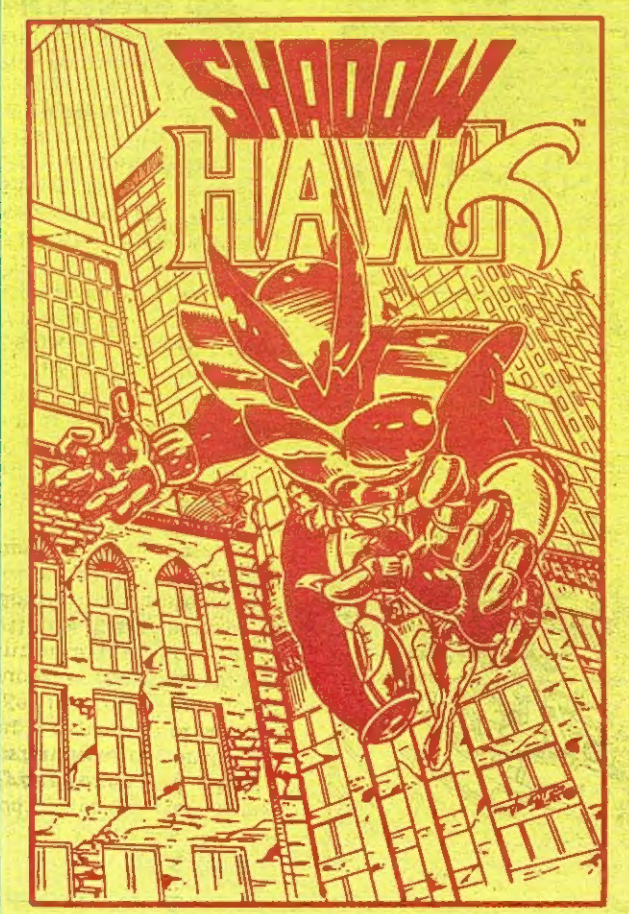
"Returning the coupons will be the *only* way fans can get copies of ***Image Comics #0,***" Olbrich said. "Copies will *not* be solicited through the direct market and will not be sold through mail order."

There will also be several Image crossovers during the month; Youngblood will guest-star in ***Savage Dragon #3*** and ***WildCATs #2***; Spawn will make a cameo appearance in ***Savage Dragon #3***; Bedrock will guest-star in ***Savage Dragon #3,*** when he and Dragon slug it out; and, after playing host for all those heroes, Dragon will guest-star in ***Spawn #4.***

Two More Image Debuts

Marc Silvestri, well-known to comics fans for his work on ***Uncanny X-Men*** and ***Wolverine,*** introduces his new super-team, ***CyberForce,*** in August. ***CyberForce*** is a mutant title: its stars are seven mutants (three women and four men) who have been organized into a super-team by CyberData, a large corporation that hopes to use them to carry out its unscrupulous activities. "Basically, what the corporation does is round up mutants, either as children--before their mutant abilities manifest themselves--or as young adults--after their abilities have manifested themselves," Silvestri said. CyberData either kidnaps these kids or buys them. And what they do is assess these people's mutant abilities and enhance them with CyberData's technology." Marc Silvestri will illustrate the book himself, but he will be joined by his brother, Eric, as co-writer of the book.

Shadowhawk is the creation of Jim Valentino, best known to fans for his work on Marvel Comics' Guardians of the Galaxy. Shadowhawk is an enigmatic hero whose secret identity is just that--not even the book's fans will know who Shadowhawk really is! The hero will first appear in a five-page preview in ***Youngblood #2,*** giving fans a chance to sample the dark hero's adventures before he debuts in his own comic. "He's pretty much a regular guy operating on his own," Valentino said. "He has no super-powers, he doesn't fly, he can't see through walls. Since his eyes are red, he does appear to have some sort of infrared lenses within his helmet. He wears kevlar armor, primarily to protect himself against bullets and that sort of thing. He doesn't really consider himself a super-hero per se. In fact, he doesn't even like super-heroes."



Valentino will establish a cast of probable alter-egos for Shadowhawk, but he will not reveal right away who is the person beneath the costume--but he intends to give readers clues as to Shadowhawk's identity to let them figure it out on their own. ***Shadowhawk,*** a four-issue limited series, will likely be followed by an ongoing ***Shadowhawk*** series later, although Valentino has plans to do other series first, including ***The Other,*** which will be his next Image series.

CyberForce #1 and ***Shadowhawk #1,*** priced at $1.95 each, are scheduled for August release.

It's a Cool World After All

Who Framed Roger Rabbit? thrilled fans with its mix of live action and animation; in ***Cool World***, Ralph Bakshi takes the concept a step further and presents a cartoon character who would do anything to become a flesh-and-blood human being... *anything*...

Holli Would, the heroine of ***Cool World,*** wants to leave the world of doodles, a world where cartoon characters exist in a cartoon reality, and become a person in the world of human beings. The key to her plan is Jack Deebs, the popular (and very human) artist of a comic book called Cool World... and all Holli must do to become human is to sleep with Jack. Of course, doing that violates the oldest rule of Cool World--but Holli isn't about to let that stop her!

Cool World is far more mature in its storyline than the landmark man-meets-toon film ***Who Framed Roger Rabbit?***--but creator Ralph Bakshi is no stranger to mature themes in animated films, having already produced ***Fritz the Cat, Wizards, American Pop,*** and ***Fire and Ice***, among others. Cool World marks the first time that Bakshi has dealt with actors on-screen, however--and with a cast including Kim Basinger and Brad Pitts, he has quite a talent pool to work with!

DC has already introduced ***Cool World*** to fans in a ***Cool World*** comic book series inspired by Deebs' supposed creation. On July 9th, DC's ***Cool World*** miniseries is followed by the ***Cool World Movie Adaptation*** by Michael Eury and Allan Kupperberg, a $3.50 64-page comic book.

A High-Tek Series

William Shatner is probably one of the best-known personalities in the television and film fields, at least insofar as comics fans are concerned; after all, he has portrayed the irrepressible Captain James T. Kirk of ***Star Trek*** fame for over a quarter-century now. In the past few years, though, Shatner has proven himself to fans via another talent: writing. As the author of two science fiction novels, ***TekWar*** and ***TekWorld,*** Shatner has thrilled readers with his vision of the gritty, high-tech future that awaits Los Angeles; beginning this summer, his vision of the future will entertain comics fans as well as Marvel brings Tekworld to comics.

TekWorld actually has some elements in common with Shatner's other television vehicle, ***T.J. Hooker:*** the main character, Jake Cardigan, is a former policeman turned private eye; he is an expert on Tek, which Shatner describes as "a computer drug of the future." Cardigan is a recovered Tek addict; now his knowledge is vital in tracking down the Teklords who are supplying the drug. ***Tekworld*** is a sort of "war on drugs" tale set just over a hundred years in the future; while much of the background is futuristic, the characters and the basic conflict have a contemporary feel.

While Shatner is acting as a consultant for the Epic series, he isn't actually writing the comic book; that honor goes to Ron Goulart, a science fiction novelist in his own right, who is initially adapting Shatner's novel ***TekWar*** in the first five issues of the comic book. Subsequent issues of the comic series will feature original stories set in the Shatner-created Tekworld. Jake Cardigan, described as a cross between Dashiell Hammett and Bladerunner, will remain as the central character of the series, investigating both low-level crime and the highest levels of corporate corruption in the futuristic L.A.

TekWorld is illustrated by Lee Sullivan, who is both penciling and inking the book. Sullivan has already demonstrated his aptitude for futuristic adventure stories with his work on ***RoboCop.***

TekWorld #1, a $1.75 comic, is scheduled for July 30th release.

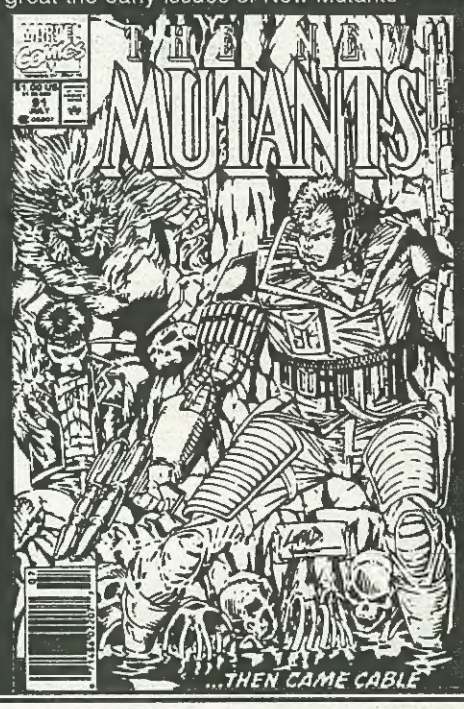
QUICKSHOTS

Bag It While You Can!...

"The response from retailers was overwhelming; everyone wishes they had ordered more copies," *Bruce Bristow* of DC Comics told **CSN.** So what is it that has retailers so excited? The **Batman: Shadow of the Bat Collector's Set**, that's what; as **CSN** has told you already, this polybagged set will offer fans two posters, a blueprint, a stand-up, and a bookmark (as well as a copy of the comic, of course), all for only $1 more than the price of the comic by itself. Because DC has to do a lot of advance planning to make sure that all the components of this set were ready for late May release, this set was produced to order; there are no extras to meet the increased demand that's likely to come about once fans see just how impressive this set is. That's why DC wanted us to pass along a word of advice to fans: if you're at all interested in this set, grab it as soon as you see it, because there won't be any second printings!

Wired For Cable

Since his cameo appearance in the final pages of **New Mutants #86,** Cable has quickly become one of Marvel's most popular mutants; fans just can't seem to get enough of the New Mutants' enigmatic leader. His popularity is so great the early issues of New Mutants featuring Cable have escalated in price so dramatically that they're out of the price range of many fans; even **Uncanny X-Men #201**, which may or may not feature Cable's true "first appearance" as the child who will grow up to become the New Mutants' leader, has become a hot back issue.



In July, fans who want to enjoy Cable's early appearances without having to take out a bank loan will be able to do so, thanks to the release of Marvel's **Cable Trade Paperback**, a 176-page volume that reprints the last two pages of **New Mutants #86** and all of **New Mutants** #s 87-91, 93, and 94 (**New Mutants #92** was a fill-in issue and is not included in this volume). These issues, written by *Louise Simonson* and illustrated by fan-favorite *Rob Liefeld,* pit Cable and the New Mutants against Stryfe, the Mutant Liberation Front, Sabertooth, Freedom Force, and Wolverine. The **Cable Trade Paperback**, priced at $15.95, is scheduled for July 9th release. (And if a reprint does satisfy those Cable fans, wait until you see the **Cable** two-issue miniseries scheduled for August release--but that's another story that you'll see soon in **CSN!...)**

Battron Up!

Wayne Vansant, the illustrator of Marvel's **The 'Nam** and the creator of Apple Comics' **Days of Darkness,** has always been a history buff; in fact, it was his interest in military history that led to his earliest comics work for Marvel. One of his pet peeves, though, has been the misrepresentation of history by some comics creators who regularly sacrifice authenticity for convenience. In **Battron,** Vansant's newest comic for NEC, he sets out to prove that a story can be both historically accurate and exciting.

Battron is the nom de guerre of a loner who abandons his past to join the French Foreign Legion at the beginning of World War II. For two decades in the Legion, he sees enough war to satisfy any adventurer; once he leaves the Legion, though, he refuses to settle down for a life of tranquil peace. Instead, he becomes a freelance soldier-for-hire.

Battron follows this adventurer's exploits, beginning with his World War II experiences. The first issue dispatches Battron and a group of commandos to free the French ship the Martel from German control. Aiding Battron and the commandos is the former mistress of the Martel's captain--but whose side is she really on?...

Battron #1, a $2.75 black and white comic will full-color covers, is scheduled for August release.

Marshall-ing Interest in Spider-Man

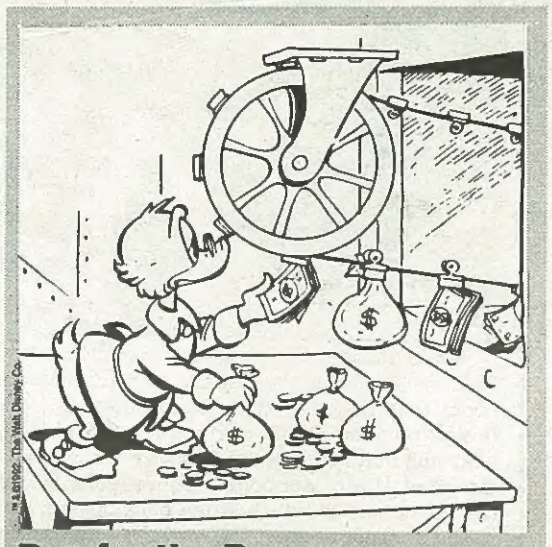
Any time *Marshall Rogers* illustrates a comic book story, it's a noteworthy occasion. When he joins forces with popular writer *Don MacGregor*, who works in comics all too rarely nowadays, it's doubly eventful--and that's just what's happening beginning in **Spider-Man #27**. That issue kicks off a two-part story in which Spider-Man gets caught up in the lives of several street tough kids; he soon discovers a drug dealing ring involving the children, and decides it's time to initiate a little gun control of his own. **Spider-Man #27,** the first half of the story, is scheduled for August 20th release.

Hero's Really Cool Series

After several unforeseen delays, Hero Comics is at last ready to bring the **Icicle** miniseries to comic fans in the next few weeks. The debut issue of the four-issue miniseries is a special 48-page deluxe-format comic featuring the adventures of Hero's cryogenically powered teenaged sneak thief. Featuring guest appearances by Flare, Lady Arcane, the Black Enchantress, and the entire League of Champions, **Icicle #1** will feature a 26-page lead story by *Dennis Mallonee, Dell Barras,* and *Howard Simpson* that picks up where **Flare #7** left off, and a backup story starring Icicle's big brother Icestar. According to Mallonee, if the miniseries is well received, an ongoing Icicle series is in the works. **Icicle #1,** a $3.50 comic, is scheduled for June release.

Young Indiana Jones Goes Hollywood

Comic fans have already had the opportunity to enjoy the comic book adventures of Young Indiana Jones in Dark Horse's comic book series **The Young Indiana Jones Chronicles,** based on stories written by *George Lucas.* Now, those who missed out on the Dark Horse versions can "catch up" when Disney's Hollywood Comics releases special deluxe-format editions of **The Young Indiana Jones Chronicles** in a three-issue miniseries. Each Hollywood Comics issue contains two issues of the Dark Horse series; all stories are written by *Dan Barry*, with art by *Frank Springer, Dan Barry,* and *Gray Morrow.* Priced at $3.95 each, all three issues are scheduled for simultaneous August release.



Run for the Rosas

Next to *Carl Barks*, there is no Duck artist more popular with today's comics fans than *Don Rosa.* Now that Rosa has become a star in the Duck World, Disney has assembled a special all-Rosa collection, **Disney Comics Special: Donald and Scrooge,** featuring an introduction and afterward by Rosa. The volume includes the award-winning "Return to Xanadu" storyline, as well as five other Rosa gems, spotlighted by a new Rosa cover. **Disney Comics Special,** an August release, is priced at $8.95.
